

**DATA LINK 2000™**

## MODEMS

For A2000/3000 owners, the DataLink 2000™ plugs directly into an internal expansion slot, while the DataLink Express™ works with all Amigas via the serial port. DataLink Express features a twelve lamp status light array and AE's exclusive "Line Engaged" indicator to show a shared line is in use.

Both DataLink modems incorporate upgrade options like Send-fax — enabling you to fax text and graphics at 4800 bps directly from your screen — without ever printing a hard copy of the information. Send any number of documents, at any time, to any fax machine. MNP-5, another upgrade option, compresses data to increase transmission speeds from 2400 to 4800 bps, while automatically detecting and correcting errors.

Both modems carry *five year warranties*, are fully compatible with the Hayes AT command set and virtually all Amiga communications software. We even include powerful communications software free with both DataLink modems. The software package includes file transfer capability, text capturing, a phone directory and many other features. Both modems are FCC certified and come complete with non-volatile memory, two modular phone jacks for data and voice calls, an on-board speaker, an extra-long telephone cable and a collection of special discounts and free on-line time you can sample. Both modems are fully compatible with Bell 103 and 212 protocols, as well as European protocol CCITT V.22 BIS, V.22 and V.21. They operate at varying transmission speeds from 0-300, 1200, 2400 and 4800 bps with MNP-5. Compare features, completeness of the package, upgradeability and price. You'll choose an Applied Engineering DataLink.
